

EMERGING LEADERS ALLIANCE

Cross-Disciplinary Leadership Training

The Emerging Leaders Alliance (ELA) was established in 2008 through a United Engineering Foundation grant to provide cost-effective, high-quality training and networking for emerging leaders in the engineering and scientific community. Its mission is to provide an interdisciplinary community of learning for engineering and scientific professionals, promoting the development of effective leaders to guide our professions in addressing the needs of people in the 21st Century. Through intensive live training sessions, cross-disciplinary networking opportunities, follow-on communication, and the availability of the ELA On Demand (recorded sessions), the ELA seeks to build upon its mission by promoting:

- Personal & professional leadership development for select engineering professionals
- Networking across engineering & scientific disciplines
- Global perspective
- Holistic systems-level thinking

EMERGING LEADERS ALLIANCE TRAINING

Emerging Leaders Alliance Cross Disciplinary Leadership Training

Who should attend: SME members between the ages of 25-35

When: November 11-13, 2013
