## Mii's MISSION:

The Mineral Information Institute (Mii) is a national 501(c)(3) non-profit organization dedicated to educating our youth about the science of minerals, mining, our natural resources, and their importance in our everyday lives.

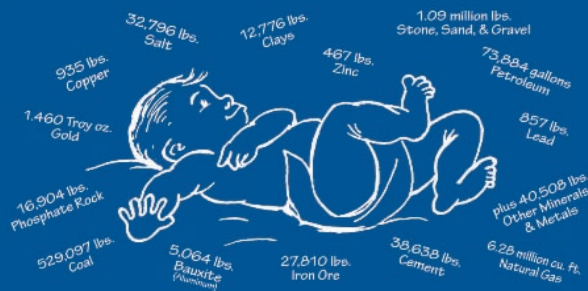

With the support from corporations, foundations, scientific associations and individuals from across the nation, Mii is able to distribute FREE printed materials to thousands of K-12 classroom teachers each year. Our materials help supplement existing curriculum and provide accurate information about the mining and energy industries.

## Statistics

An average of **180,000 visitors** are coming to our website [www.mii.org](http://www.mii.org) every month. Those visitors are generating **4.5 million hits, 600,000 page views**, and downloading FREE materials.

**450,000 FREE packets** containing lesson plans, classroom activities, and posters have been sent to educators who contacted us requesting materials.

Every day one high school teacher reaches an average of **150 students**, and one elementary teacher reaches an average of **24 students**. Multiply that by thousands of teachers and the numbers just keep growing.

The Mii Minerals Baby is updated every year to provide an awareness of the amount of minerals and energy that each American will need during their lifetime.

Information from Mii  
about the importance of mining  
is information that gets used.

## What Teachers are Saying:

"It is through programs such as yours that teachers are able to balance the scales, showing the real picture. Your materials are great. Keep up the good work!"

*Mark Barton, Gainesville, GA - Earth Science - 8th grade*

"Your teacher guide will be the core of my geology study unit. Mii material provides the most complete information I have found concerning mining and minerals."

*Jeannette Webb, Custer City, OK - Science - 4th-6th grades*

"Your materials brought things home for students, connecting natural resources with everyday objects they use."

*Denise Olesak - Pittsburgh, PA - 2nd grade*

"The students have no clue that they rely on minerals to live and to maintain their current lifestyle. Your materials help students see how and why minerals are important to them."

*Beth Moeller, St. Charles, MI - Science - 7th grade*

"Your materials coordinate well with the unit on metals and minerals in our ChemCom chemistry textbook. I will put it to use immediately."

*Kathy Teski, Loveland, OH - Chemistry - High School*

Mii exists because of donations and support from individuals and companies like you.

Help Mii and the teachers in your community accurately **SPREAD THE WORD** about the importance of mining.

SUSTAINING LEVEL - \$ 50,000 or more

PREMIUM LEVEL - \$ 30,000 - \$49,999
