NEWS RELEASE

OneMine.org Adds 8,038 SME Preprints to the Library

SME is pleased to announce that all its preprints from 1958-2010 are available now on OneMine. Previously years 2000-2010 were online. 1958-1999 were retrieved from the archives and digitized for online search and download. SME preprints are technical papers from SME meetings that encompass the fields of coal and energy, environmental, industrial minerals and aggregates, geology, mining and exploration, mineral and metallurgical processing, mineral economics, underground construction and tunneling and much more.

OneMine.org is the definitive global, online digital research library for the mining and minerals community. OneMine is a collaborative effort by several professional associations around the globe. It is the single source to find answers to technical questions. OneMine also has an advanced search engine to specify detailed criteria. It is a comprehensive body of mining, minerals, and underground construction knowledge. It currently features more than 76,000 searchable, down-loadable documents. OneMine boasts more than 15,000 registered users 100,000+ downloads this year along.

OneMine has seven Participating Societies that contribute documents. They include: The Society for Mining, Metallurgy, and Exploration Inc., (SME); The Minerals, Metals and Materials Society, (TMS); Southern African Institute of Mining and Metallurgy (SAIMM); The Australasian Institute of Mining and Metallurgy, (AusIMM); NIOSH; International Marine Minerals Society, (IMMS); Deep Foundations Institute, (DFI).
