

one need. one source...

the online global mining and minerals library™

OneMine.org is the definitive global online digital research center for the entire mining and minerals community. This web-based document library will grow to include several hundred thousand articles, technical papers, books and other documents from industry and societies worldwide. **OneMine.org** will be the single source for users to access this collection of mining and mineral literature.

OneMine.org is a collaborative digital library that includes technical publications from a multitude of mining and minerals organizations worldwide. By launch in September 2008, thousands of articles will be available to participating society members. An advanced search allows users to specify criteria. Users can search by topic, author, title and date range.

OneMine.org provides:

- **The single source to find answers to technical questions**
- **A comprehensive body of mining and mineral knowledge**
- **Information accessible by anyone needing technical data**
- **Unlimited access to documents for participating society members**
- **An advanced search engine for detailed criteria**
- **Centralized, affordable resource for the entire industry**
- **Broad exposure for participating technical organizations**

Although, anyone can use **OneMine.org** for a per article fee, participating society members will receive unlimited use as part of their member dues, along with all the other membership benefits.

For more information on participating society member benefits, **OneMine.org**, or other related products and services contact:
