

This program has been designed to provide a variety of success stories from industry colleagues utilizing Mii materials. Topics include engagement with community, educators, associations, and SME student outreach activities.

Speakers from GEM, the Colorado Mining Association, and Western Business Roundtable/Northwest Mining Association will focus on aspects of their community/educational participation that contribute to their programs' successes.

Teacher- and Mining-industry workshops developed in Kentucky and Missouri will provide the audience with case histories utilizing Mii materials that engage educators while fulfilling state-mandated core curriculum requirements.

Closing the session will be the Colorado School of Mines/SME students sharing their experiences in K-12 classrooms, encouraging their peers to do the same.

Monday, March 1, beginning at 2:00 p.m.
Phoenix Convention Center, Phoenix, Arizona
