NEWS RELEASE – September 13, 2017

IAMSH of SME Mine Safety Certification Exam
Call for Certification Panel Volunteers

The International Academy for Mine Safety & Health of the Society for Mining, Metallurgy & Exploration Inc. (SME) (IAMSH of SME) has issued a call for volunteers to develop the certification examination for the new Certified Mine Safety Professional (CMSP) certification program. The CMSP was acquired from the International Society for Mine Safety Professionals (ISMSP) earlier this year, and will be administered by the IAMSH of SME.

SME is seeking health and safety subject matter experts to become volunteers to develop the certification examination for the new certification program. Interested parties are invited to review the qualifications, time commitment and service requirements here and submit their names for consideration to Dr. Andrew P. Schissler PE, IAMSH Coordinator, at Schissler@smenet.org or 720-202-5683 by September 22, 2017.

SME understands the need for an accredited safety certification for the mining industry, both domestically and internationally, and is committed to make it the premier mine safety certification program in the world.
